Python Programs

Print Hello World

```
print("Hello World")
```

```
Hello World
```

Create two variables and print their addition

```
a = 10
b = 5
print("Addition =", a + b)
```

```
Addition = 15
```

Print their difference

```
a = 10
b = 5
print("Difference =", a - b)
```

```
Difference = 5
```

Print their multiplication

```
a = 10
b = 5
print("Multiplication =", a * b)
```

```
Multiplication = 50
```

Print their division

```
a = 10
b = 5
print("Division =", a / b)
```

```
Division = 2.0
```

Print their modulus

```
a = 10
b = 5
print("Modulus =", a % b)
```

```
Modulus = 0
```
